Table of Contents

1   Objective

1 Assignment 1:

<u>Estimated time: 1 hour 30 minutes</u>

1.   Create a ASP.NET Web Project BankApp.

 Create an aspx page called index.aspx which has a link to Branch.aspx. Branch.aspx has a Form which accepts the following information from the user.

 BranchId : int

 BanchCode   : String

 BranchName: String

 BranchAddress: String

 It also has 3 submit button to perform the following tasks

 Add, Delete, Save

 On click of any of the buttons , generate an event which will display an appropriate message depending on the button clicked.

2.   Create an aspx page called index.aspx which has a link to Account.aspx. Account.aspx has a Form which accepts the following information from the user.

 AccountId : int

 AccountNo   : String

 Balance: double

 PinNo: int

 CreatedDate: String

It also has 3 submit button to perform the following tasks

Add, Delete, Save

On click of any of the buttons , load the AccountServlet.java which will display an appropriate message depending on the button clicked.

2 Assignment 2:

Estimated time: 1 hour

Our HappyTrip Hotel Booking Site is a user friendly site. Create a login.aspx with AccountNo, PinNo. Also include a rememberMe checkbox. When a user click on the login submit button we need to validate whether the AccountNo, PinNo is validate after reading from the repository.
